

# myREDCAP CLOUD PATIENT PORTAL

REDCap Cloud delivers the industry's most comprehensive solution for hybrid or decentralized clinical trials. Designed to simplify patient enrollment and participation throughout the clinical trial process, myREDCap Cloud provides patients with a single point of access to remotely engage in a clinical trial via a web browser or mobile device. Designed to build ongoing relationships with potential or current clinical trial patients, myREDCap Cloud delivers a complete and intuitive set of tools to support clinical trial recruitment and participation.

## Benefits of using myREDCap Cloud

- Empower patients to learn about and participate in clinical trials from any location via mobile device or web-based portal
- Develop a broader view of the patient experience by balancing subjective patient feedback with continuous, objective device data
- Accelerate timelines by connecting with a wider range of patients through our eRecruitment and eScreening tools
- Enable research sites to reach a larger and more diverse patient population by cutting down on the need for in-person visits

## Features

### CLINICAL REGISTRIES

Aggregate and analyze patient data in real time while building an ongoing community with patients and hospitals.

### eRECRUITMENT

Make it easier for patients to connect and sign up to participate in clinical trials via surveys, email, and social media.

### eSCREENING

Quickly identify the right patients for your clinical trial through myREDCap Cloud's mobile app or web browser.

### eCONSENT

Enable patients to consent onsite or remotely via the myREDCap Cloud portal.

#### eCOA

Capture patient and caregiver feedback in real-time through iOS or Android mobile app or web-based portal.

#### PATIENT SURVEYS

Deliver enhanced flexibility to collect patient feedback via direct email, distribution lists, websites, or customized solutions.

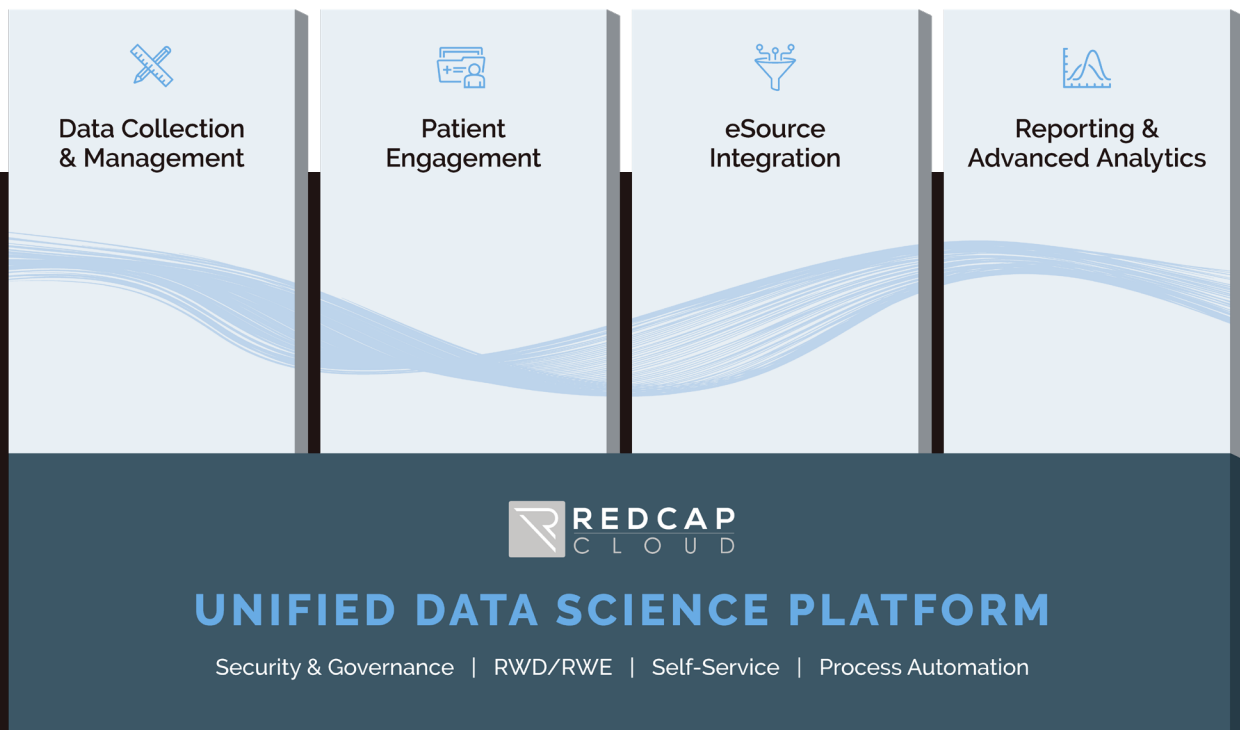

#### LAB BARCODING

Enables home health nurses to collect patient samples and affix a barcode that associates the sample to the patient's myREDCap Cloud account.

## REDCap Cloud Unified Data Science Platform

### THE INDUSTRY'S MOST FLEXIBLE DATA SCIENCE PLATFORM

REDCap Cloud technology empowers organizations to easily collect, integrate, standardize, analyze, and report on real world, regulatory-grade data for any use case. Our modern platform delivers a customizable suite of integrated applications to support development of life science breakthroughs from research to commercialization.

REDCap Cloud is powering the next generation of scientific breakthroughs. Discover more at [www.redcapcloud.com](http://www.redcapcloud.com) and [follow us on LinkedIn](#).
